

Part 1

Question: Do you work or study

Well, I am a student. I am studying at a five-year college called the National Taipei College of Business, which is a well-known college. The major which I'm studying at the National Taipei College of Business is International Trade. The reason why I chose this subject to study is because I am interested in Business and I enjoy it very much.

Why did you choose that subject?

At school, we also have some other subjects which are related to business that we can select. For instance, Accounting, Financial Management, Investment and so on. I'm fond of all of these subjects. I consider that if I learn them, there will be more job opportunities waiting for me. If I study Accounting as my major, I could be an accountant in the future. And if I concentrate on Financial Management, I could be a financial analyst.

What do you like about your studies?

If you ask me what's the best thing about studying. I guess I would say it depends. But I think I am good at these subjects and I have better ability to learn, so I should try my best. For me, study is just a thing that I like very much. ~~And I am just "Do what I like, Like what I do."~~ And, I am the sort of person who just does what they enjoy.

Part 2

Question: A Place you would like to visit

Ok then, to start with I will talk about Puli, which is the place that I would like to travel to. The first thing I'd like to mention is that there is a famous chocolate store called 18 degrees in Puli. I like chocolate very much. The chocolate there is the most delicious that I have ever tasted. If you don't want to go to the actual store, you can buy their chocolate on the Internet instead. It's much more convenient.

Going on to my next point there is a popular lake that many foreigners like to visit called Sun Moon Lake, and the thing that needs to be highlighted here is that the scenery there is spectacular. There are many sorts of activities that we can do there. For instance, riding a bicycle, rowing a boat, taking a gondola, and so on. I rode a bicycle around the lake once. It was great because I could view the lake clearly. It's a fond memory that I think I will never forget.

Progressing to the subject of a place that would I like to go there. I would like to explain that a bed and breakfast there is very prevalent. There are lots of beautiful holiday apartments. If you go there you can also try one.

Question: People: A childhood friend

Well, I would like to talk about a childhood friend of mine. We first met each other when I was in fifth grade in elementary school. Everything was just like a miracle that we were not only study in the same elementary school but also study in the same grade.

The main reason why we knew each other is that her family moved to the building where I had been living since I was born. She is a talkative person. When we were in junior high student, we studied at a different school. Fortunately, when it came to senior high school we were studying at the same school, and also studying the same subject. We always study together.

Part 3

Question: Do you think people will be more intelligent in the future?

Well, that's an interesting question. I've never really thought about that before. Some people think that people will be less intelligent. Because of the new inventions, humans will become lazier. They don't need to do things by themselves; they can just use machines to finish what they have to do. But I guess I would have to say that I agree.

[These two paragraphs don't fit well together]

This is because even though most of problems have been solved, there are still some problems left, such as cancer and AIDS. Facing these challenges, I think people will work harder to figure out the solutions to solve these problems. Human may get some treatment or invent some drugs to cure cancer and AIDS someday.

My overall feeling is that you need to work harder on rephrasing the words in the question and also to make longer sentences. There are many short sentences in here and this is likely to limit your score for grammar to 6. Lots of errors with "in/at"
